

# SPINNING-REEL FISHING-LINE GUIDING MECHANISM

## ABSTRACT OF THE DISCLOSURE

A bail arm includes a first bail-support member, a second bail-support member, a bail, a stationary shaft, a line roller, and a stationary shaft cover. The bail includes a  
5 rod-shaped portion formed into a rod shape and a plate-shaped portion formed into a plate shape. . One end of the plate-shaped portion is inserted into a slit-shaped groove portion formed in the stationary shaft cover such that at least radially outer sides of the plate-shaped portion and the stationary shaft cover define a continuous and smooth surface. The other end of the plate-shaped portion is formed continuously  
10 and smoothly with the rod-shaped portion
